-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Goringe et al.

(US 2003/0043820).

1. Regarding claims 1, 5, 9-15 and 17-18, Goringe discloses an autonomous system (figs. 1-2) comprising two or more areas (fig. 1; para. 3, last eight lines) including a router, and a probe (fig. 2) logically connected to the router in each area and configured to receive link state routing protocol from the router in each area (para. 23, lines 16-23). Further regarding claim 11, a router is selected (paras. 29-32; para. 68, lines 1-6) for a logical connection to be created (note: IP connection using SNMP).
2. Regarding claims 2 and 6, the probe receives link state information when the router floods the information through the autonomous system (para. 7).
3. Regarding claims 3 and 7, the probe receives link state information when it polls the routers (para. 29).
4. Regarding claims 4, 8 and 16, the link state information is cost information (para. 23, line 22).
